Easing the burden of DSCSA Loan/Borrow Management:
ConsortiEX simplifies the process for Children's Hospital of Wisconsin

An up close look at ConsortiEX's DSCSA Compliance as a Service (CaaS) Application with Michael Lange, Pharmacy Technician Supervisor, Children's Hospital of Wisconsin

"Loan/Borrow situations present unique challenges for DSCSA Compliance and they were a real pain point for us."

"We do a lot of loaning and borrowing of medications work with Froedtert Hospital because we're both located on the same medical campus."

"I'm tasked with ensuring that they get all the T3 documents for the products we loan to them, as well as making sure we get all the necessary documentation at our end required for DSCSA Compliance."

Manual process was extremely time-consuming:
"Previously, we were doing everything by hand. So we were manually pulling data out of AmerisourceBergen and writing out all the T3 documentation. Then, we kept the

> *Now, with the ConsortiEX DSCSA Compliance as a Service (CaaS) Application, the entire compliance process is really quick and easy for us.*

data we created on a searchable drive to create as much of an electronic record as possible."

Primary Loan/Borrow resource already utilizing ConsortiEX:
The Froedtert & the Medical College of Wisconsin health system was already utilizing the ConsortiEX DSCSA Compliance as a Service solution. So when we went live with our EDI feed, everything was very seamless. When we create a T3 document, the data we need populates itself, so we see the documentation pretty instantaneously and

it makes it so much easier for us to keep a complete history. The ConsortiEX solution has been a big time-saver for us."

From time-intensive to automated and paperless:
"Before ConsortiEX, we had to manually search tens of thousands of transactions. Basically every Loan/Borrow situation involved a call to our wholesaler's technical support."

"Now, we simply search the NDC and the lot number; then, the date range. The data required for a T3 document is pre-populated for you. Then, since both Froedtert and we use the ConsortiEX system, it's electronically transferred, so there's no paperwork."

"ConsortiEX has really simplified the process of DSCSA Compliance for us. And the support from their staff has been top-notch. They are very responsive, thorough and helpful – and their commitment to customer service continues to impress us."

DSCSA Compliance as a Service is part of the ConsortiEX ERP Suite of software, systems and services... the most advanced pharmacy data resource available. These solutions (which include the Assure-Trak® IV Workflow Application and EXchange Application with Orders and CSOS modules for affiliate institution product distribution support) enable enterprises to conveniently and effectively address pressing supply chain issues, ranging from regulatory compliance, to patient safety and cost control.
